DETAILED ACTION

This office action is in response to the Applicant's Remark filed on 2/17/2005. The Examiner finds the argument to be persuasive. In further reviewing the application, the Examiner withdraws all rejections and allowable subject matters there are objected to due to dependency of rejected claims and the Examiner wishes to present a new ground of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-24 rejected under 35 U.S.C. 102(b) as being anticipated by Barbarossa et al. (US 6,442,311 B1). Disclosed as prior art, Barbarossa et al. teaches a planar arrayed waveguide grating having heaters to provide a temperature gradient across array waveguides. A temperature gradient is simply a difference in temperature measurement and by applying power to the heater at different regions will supply such gradient. As shown in Fig. 4C the heaters are on the opposite side of the circuit and in a generally same configuration as said waveguides. The heaters are actuatable by the CO₂ laser 510, and laser is mounted such that selective heaters are actuated.

3. Applicant's arguments, see Applicant's Argument, page 1, filed 2/17/2005, with respect to the rejection(s) of claim(s) 1-9, 10, 13-17 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further

Art Unit: 2883

consideration, a new ground(s) of rejection is made in view of Barbarossa et al. as presented above.
